

Oncquest Laboratories Ltd.

A-17 Infocity Sector-34 Gurugram Haryana - 122001

Name	Ms. DIVYA 100205740	Centre Details	Q R G Medicare Ltd.
Age	25 Yrs	Sex	Female
Ref. No.	0708401354663	Plot No 1,	
Regd. Date	28/07/2022	Reg. ID	440022075800
Coll. Dt. Tm.	28/07/2022 07:00:55	Ref. By	SELF
Recd. Dt. Tm.	28/07/2022 08:00:58	Report Dt. Tm.	28/07/2022 11:33:02
		Hospital No.:	

SARS-COV-2 RNA (Qualitative)

RT-PCR (Open System)

FINAL RESULT

Negative

Specimen type: Nasopharyngeal and Oropharyngeal Swab

Lab ICMR Registration No: SLSGU001

Interpretation(s)

Detected result is considered a presumptive positive test result for COVID-19. This indicates that RNA from SARS-CoV-2 (formerly 2019-nCoV) was detected, and the patient is preemptively infected with the virus and presumed to be contagious.

Not Detected (negative) test result for this test means that SARS-CoV-2 RNA was not present in the specimen above the limit of detection. However, a negative result does not rule out the possibility of COVID-19 and should not be used as the sole basis for treatment or patient management decisions.

Inconclusive/ Invalid : Repeat test is required consider collecting a new specimen.

Presumptive positive for Sarbecovirus: Additional testing is required to differentiate between various species of Sarbecoviruses like SARS-CoV-2 & SARS-CoV-1 or other Sarbecovirus currently unknown to infect humans, for better clinical management or epidemiological purposes. Kindly consult referring Physician / Authorized Govt. hospital for appropriate followup.

Limitations:

1. Negative results do not preclude COVID-19 and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.
2. If the virus mutates in the rRT-PCR target region, 2019-nCoV may not be detected or may be detected less predictably. Inhibitors or other types of interference may produce a false negative result.
3. The performance of this test has not been established for monitoring treatment of 2019-nCoV infection.

Note:

1. The test is performed using ICMR and FDA approved Kit.
2. Specimens with Presumptive Positive or Inconclusive results will be referred to the appropriate Government laboratory for additional test.

This test is intended to be performed only using respiratory specimens collected from individuals who meet revised testing strategy for COVID -19 ICMR criteria for testing on human specimens which are available at Indian Council of Medical Research Government of India www.icmr.nic.in. COVID-19 Test conducted as per the protocol of Govt. of India.
